

# INMOTION TECHNOLOGY

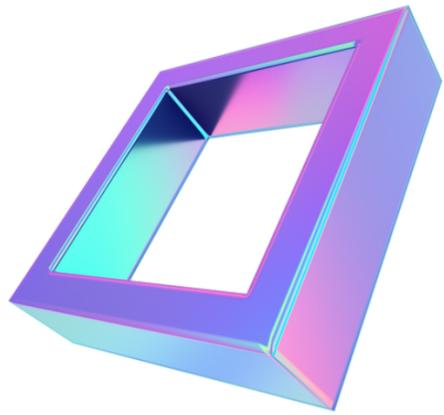

3D Mapping and Multimedia technology

- Hangar Media Group was founded in 2008 and specializes in the development and implementation of creative, engineering, and technological solutions, as well as in the creation of content for interactive installations, 3D mapping, stage set designs, virtual reality projects, and other experiments in the field of digital and light-based art.

**The company's offices are located in Bishkek, Kyrgyzstan, and Dubai, United Arab Emirates.**

## 3D MAPPING

It represents a 3D projection applied to any surrounding object or structure, taking into account its geometric characteristics and spatial location.

dataton

DATATON WATCHOUT™ WATCHOUT

A fully scalable, software-based system that does not require any specialized hardware.

## RESOLUME ARENA

A tool for performing audiovisual work. It allows playback of video, audio, and audiovisual clips, mixing them together, applying effects, and outputting the results live or recording them.

MADRIX  
LIGHTING CONTROL

## MADRIX®

профессиональный продукт, предназначенный для управления светодиодными приборами, для создания комплексных визуальных решений на мероприятиях и объектах различного уровня

A full range of services for the creation and production of corporate and large-scale events.

## PROJECTS

- Projection installations for presentations
- Museum installations
- Interactive installations

## CONCEPT

We create content for projection and LED screens, and develop visual concepts for concerts and live shows.

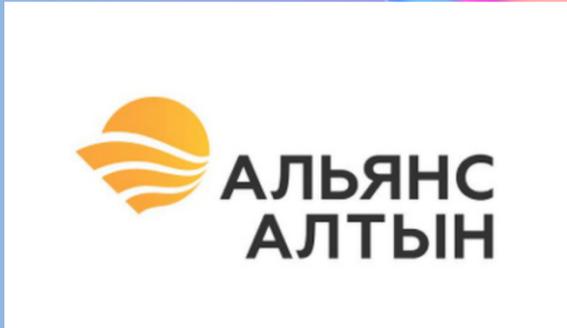

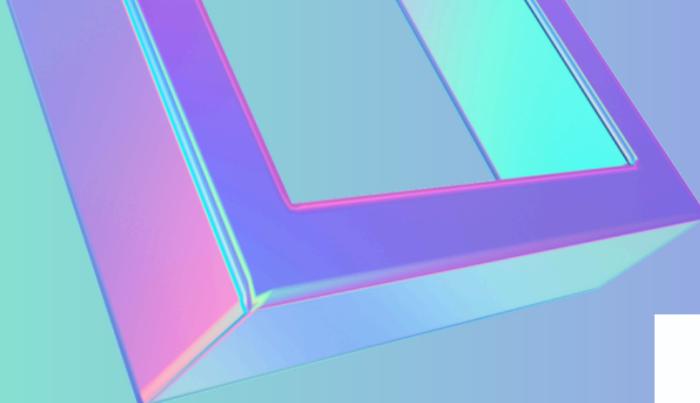

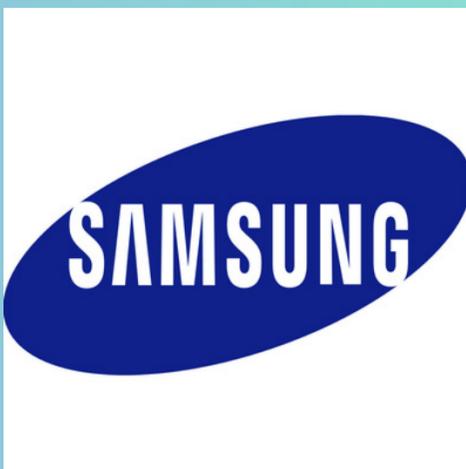

## MOTION DESIGN

Creation of motion design as a visual component to precisely convey ideas and emotions. We continuously improve our skills in 3D animation.
